(54) Title: CONTAINER WITH CAP RETAINER

(57) Abstract: A container having a container opening and a reusable cap for sealing the container opening has a cap retainer for storing the cap in a storage configuration when the cap is not being used to seal the opening. The cap retainer may be provided by a slot defined by a pair of sidewalls. The slot has at least one open end. Each of the sidewalls provides a contact surface which engages the cap for securing the cap in its storage configuration within the slot.
